

Maintain the Quality & Cost Of Your Health Care!

This nation is in the midst of a health care crisis. Everywhere you look, catastrophic costs and insufficient care are wreaking havoc on American families. Your IAM contract should be your defense - your ticket to high quality, comprehensive and affordable medical insurance. Nobody should go without their medications because their prescription costs are too high. Nobody should delay a doctor's visit because they can't afford it. Just a week's delay could be too long!

Corporate America will insist high health care costs means higher out-of-pocket expenses for employees.

Demand that BIW doesn't fall into this trap. Demand BIW takes care of the health of their workers and their families. A healthy workforce is a productive workforce.

This country's retiree's, the baby boomers, all 78 million of them will soon be retiring. Will health care be available? We need to secure our retiree's health care through an IAM contract.

*Tell BIW, "Protect Us, Protect Our Families & Protect Retiree's!"
Reward our hard work and commitment with medical insurance for ourselves and our families.*
